Care and Construction

Nylon

Material Characteristics

Designed for Long-Term Applications

PVC-coated nylon is commonly used in insulated bags. PVC (polyvinyl chloride) is the world's third-most widely produced synthetic plastic polymer. Nylon is tear resistant with a high tensile strength. Combining these two materials with a fiberglass insulation creates a bag capable of keeping the temperature of its contents constant.

Product Description:

- Specimen Transport Tote - Large
- Insulated heavy-duty, PVC-coated 210D nylon
- 1.50" wide adjustable carrying strap, shortens to 30.50" (77.6 cm) and lengthens to 53.25" (135.20 cm)
- Safely accommodates ice packs or dry ice
- Lockable zippers
- Interior and exterior document pouches and windows
- Biohazard logo
- Outer Shell: Charcoal PVC-coated 210 Denier Nylon
- Inner Lining: White 210 Denier Nylon
- Insulation: Compressed Fiberglass
- Made in Canada

Primary Area for Product Usage:

- Safely transports perishable specimens

Dispenses:

- Holds item(s) up to 18.00"W x 13.00"H x 9.00"D (45.7 cm x 33.0 cm x 22.9 cm)

Product Specifications (overall external dimensions):

- 18.00"W x 13.00"H x 9.00"D (45.7 cm x 33.0 cm x 22.9 cm)
- 2.5 lbs (1.1 kg) - approximated

Package Specifications:

- Package Quantity: 3 per case
 - 18"W x 16"H x 10"D (45.7 cm x 40.6 cm x 25.4 cm)
 - 9.0 lbs (4.1 kg) - approximated
- Package Quantity: 1 per case
 - 18"W x 16"H x 10"D (45.7 cm x 40.6 cm x 25.4 cm)
 - 5.0 lbs (2.3 kg) - approximated

Care and Cleaning

Use mild soap and water to clean. Petroleum-based oils, solvents, and paints should not be used.

Standard hospital cleaning supplies can be used.

The liner can be wiped clean with a 10% bleach solution.
